Saturn in Leo

Mars and Venus with the Moon

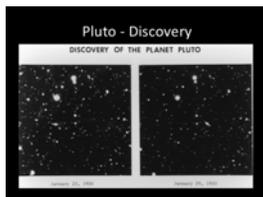

In the night sky we saw objects moving through the fixed stars.

Mars

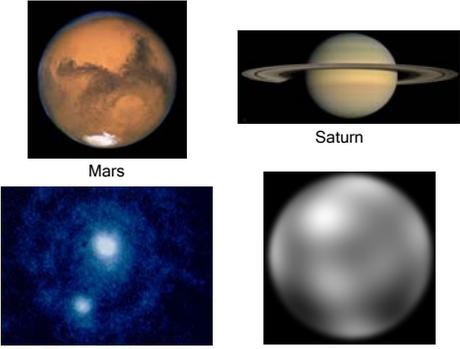

Saturn

Discovery of Pluto

We observed these objects, asked questions, and developed ways to help us see these as new worlds and discover other worlds.

Mars

Saturn

Pluto and Charon

Pluto

We observed these worlds, asked new questions, and developed ways to help us see these worlds and discover other worlds.

Mars

Saturn

Pluto

Charon

New observational methods, new discoveries, and new questions.

**New worlds have been discovered beyond our Solar System.
What will we learn in the future?**
