

Subject: **Marcus Engineering**, LLC. EE, CE Full Time and Interns – The Best of the Best.

Computer Engineering at MIT, Product development at Google Inc., VP of Engineering after 5 years in industry, Nationally Recognized Rising Engineering Stars: This is the caliber of the Marcus Engineering team.

At **Marcus Engineering** we train and grow the best Electrical and Computer Engineers in the industry. Whether you stay on with us long term or work with us through school, we take enthusiastic Makers and Hackers and turn them into the industry's most prized engineers.

If you are looking for an internship or job that challenges you and constantly has you learning new skills, if you are the type of person who can work well with small teams for quick turnaround projects that require fast thinking, self direction, rapid learning and constant productivity, if you are the type of person who thinks of yourself as a DIYer, Tinkerer, Maker, or Hacker and who loves to absorb the newest in technology, then Marcus Engineering might have a spot for you.

Marcus Engineering is looking for both paid interns and full time employees to join our engineering team.

Marcus Engineering is a small growing Tucson engineering consulting company that specializes in a wide range of design and engineering services from embedded systems, wireless networking, PCB design, failure analysis, custom test equipment, PLC programming, industrial automation, power electronics, and other high end electronic solutions. We preferentially focus on high end products such as Medical Devices, Military, and Aerospace products.

We are looking to hire people who can adapt to ever-changing projects and new technology and who like to work in small, fast paced teams.

Visit www.marcusengineering.com and see what we are about. Please send cover letters and resumes to info@marcusengineering.com. Pay depends on experience.
