

Guider: Temporary Fix

1. close the secondary and guider GUI
2. open a new terminal
3. at the prompt type `sudo service webclient-compose stop` and hit enter

NOTE: It will ask for your password. Use the standard vattobs password

NOTE: it takes a while for this to die... I've seen it take 30 or more seconds

1. when the prompt reappears, type `sudo service webclient-compose start` and hit enter
2. this should return pretty quickly, within 5 seconds or so
3. You're done
