

What's new at the 61"?

1. The upper windscreen is now working!
2. The password for bigccd1 is "azcam".
3. The "kill bigpop" icon on bigaux is not working.
4. The hot keys f9 and f10 are no longer in service.
5. The first time coming out of lightning shutdown, bigccd will freeze on the first exposure you take, locking the entire system and forcing you to hard shutdown the computer. To prevent this, when you first turn on bigccd restart the computer through the "start" menu before opening azcam.
6. There is a new generator that fires up automatically when Trico power is lost.
